

## How to care for your Bamboo Floors

- Vacuum or sweep floor regularly
- Remove spills promptly
- Place mats at exterior and interior doors to trap sand and grit from incoming traffic
- Use rugs on high traffic areas
- Stick soft pads to the base of all furnishings in contact with the floor
- When moving heavy furniture or appliances always pick it up rather than sliding it across the floor
- Keep pets' claws properly trimmed to avoid excess scratches and gouges
- Clean with a damp mop with warm water and methylated spirits (approximately 20-40ml in 4.5 litres of water)
- To remove glue deposits use undiluted methylated spirits
- Make sure there is a minimum humidity of 35%-50% in the room, if necessary use a humidifier.

## What not to do

- **Do not steam mop or wet mop floor surface area after installation. Excessive wetting cycles may damage the floor surface.**
- Do not let sand, dirt or grit build up.
- Avoid walking in narrow point or stiletto heel shoes.
- Do not use waxes, oil soap or other household cleaners on the floor. The use of these products can dull today's floor finishes and make refurbishing difficult.
- Do not roll or slide heavy furniture or appliances across flooring.

## Floor Care - 3 Easy Steps

### 1. Dry Mop

Always remove dirt and grit prior to cleaning your timber floors with an electrostatic dust control mop. Avoid using vacuum cleaners and bristle brooms.

### 2. Spray

Lightly mist a 1-2 m2 area of your timber floor or directly mist the Bona floor mop cover with Bona Hardwood Floor Cleaner.

### 3. Wipe

Using a back and forth motion, clean the floor surface with your Bona floor wipe mop. Finish one area before moving on to the next. The Bona mop's low profile and easy to manoeuvre swivel head makes it the perfect cleaning tool for hard to reach areas such as under furniture and cabinets, around doors or in tight corners. When both sides of the cover become soiled, replace with a clean cover. Continued use of excessively soiled covers may cause streaking. Your Bona floor wipe mop covers are reusable. Simply wash dry.

Your Bona Microfiber cleaning pads are reusable and washable. Do not use any fabric softeners, dryer sheets or bleach on your Microfiber cleaning pad as these products will diminish the natural cleaning characteristics of the microfiber.

When a spill occurs, soak up the liquid right away. Mist the area with cleaner, and wipe with your Bona Microfiber mop or a Microfiber Floor Cloth.

**Use Bona or similar products promoted by your Retailer**
