

Crocs goes Green - Again

Crocs have chosen to use Style Strandwoven Bamboo flooring supplied by ECO FLOORING SYSTEMS for their new store in Chatswood.

There could be many reasons for their selection of Bamboo flooring,

- As a follow up to its successful use in their Victorian store.
- Because it is one of the hardest wood alternatives in the world/harder than almost every other natural flooring product.
- Constructed from an environmentally friendly, rapidly renewable resource – GECA accreditation
- Uniclic profile for floating floor installation ensures speedy installation reducing down-time
- Pre-finished so no need for messy sanding and coating on site

Style solid bamboo flooring is available in 96mm wide T & G for direct stick installation as well as the 130mm wide Uniclic profile for floating installations.

Available in three natural colours-Coffee, Suede & Natural or five stained colours that would complement any decor.
