

Style strandwoven Flooring used in Multi Purpose School Hall

Kambala school in the Eastern suburbs of Sydney was looking for a flooring option for their new Multi Purpose Hall in the early childhood centre. A flooring option that was very durable, allergy free, environmentally sound and naturally good looking. Style Strand Woven Select bamboo flooring supplied by Eco Flooring Systems was chosen as a sustainable, state of the art material in keeping with the brand new facilities, while practical and easy to maintain.

The Style Strand Woven bamboo flooring has proven to be an ideal choice. It is able to withstand the traffic of school functions including cocktail parties, children's dining room and a myriad of activities in the MPH.

Style Strand Woven bamboo flooring is the only bamboo flooring with the GECA accreditation. Not only is it eco friendly, it is extremely hard and durable and comes pre-finished so there is no need for messy sanding and coating on site. While spotted gum and blackbutt are the timbers specified for multi purpose halls by the Department of Commerce, Style strand woven bamboo flooring is an ideal timber flooring alternative that is harder than most Australian timbers and price competitive. The flooring comes in set length T&G prefinished planks and is installed using the direct stick method or there is a Uniclic glueless floating floor available.
