

Sustainable BT Bamboo flooring for Todae

The recently opened Todae store in Bondi Junction Plaza has a philosophy of embracing sustainability without comprising comfort, and creating solutions for a sustainable future.

It is therefore no surprise that they have installed BT Bamboo Flooring, not only on the floor but as a stylish backdrop to the shops logo at the entrance.

Architects are increasingly specifying BT and Style Bamboo not only for companies that are “green” but for those who want a stylish, functional and hardwearing natural Flooring product. Eco Flooring Systems supplies both BT Bamboo and Style strandwoven bamboo flooring.

Todae chose BT bamboo Carbonated Amber Vertical wide board with a Commercial Satin finish - a durable finish with additional slip resistance required for some installations.

BT Bamboo is available in wide board 152/90 x 1900 x 15mm and is a T&G plank pre-finished all ready to install.
